KA has notified the Chairman via email that he wishes to raise 2 points in the AOB. Firstly after a discussion it was agreed by all that as requested by KA the meeting minutes are to be put onto the CBOA web site, after they have been approved and agreed by the following Committee meeting. RH/DL
Secondly, the secretary is to report at each AGM on how well the CBOA has succeeded in meeting the objectives of clause 2 of the Constitution. This was discussed and not seen as necessary as the Chairman reported generally on CBOA achievements and matters generally.
8. -

9. Secretary. Sharon Taroni had been met informally by CBOA officers before the committee meeting to discuss her appointment and likely tasks/duties. After a brief discussion all agreed she is eminently suitable. As of now Sharon needs to be Secretary Elect for the purposes of the following AGM today – agreed by all.

10. Emissions (BH). **BH to start to get this function under way with respect to how CBOA should respond and position inland water transport with respect to the topic.**

BH

Air quality & emissions is a big future issue, what is in prospect? Ricardo report - survey of marine regulations – **BH to investigate.**

BH

CRT are sensitive to the emissions issue; CBOA should know where it is positioned, have a forward thinking stance and not be vulnerable. With cleaner lorry engines, barge engines generally are older, therefore not seen in good light with emissions. Comparisons need to be used for barge v. lorry emissions with per unit weight carried, or emissions per tonne/mile comparisons. Chambers wharf send weekly stats on barge use – 1091 lorry transits obviated have been quoted.

CRT/MCA/Navigation Matters

11. MCA Humber estuary partially smooth water limit (DL). MCA response received – MCA does not agree with the proposal – Professor Hardisty says we should meet them to discuss how this may be achieved and to define the way forward. £200 approx is needed for the professor's time. Agreed by all that we accept this cost and go ahead to resolve the issue.

Lobbying and Strategic Projects

18c. ERSTU (DH) written report provided to the meeting as follows (but not read out):

DH was unable to get to Berlin for the 42nd meeting of the ERSTU Committee on February 20th 2018. On June 20/21 at Lubeck there will a two day conference concerned with Short Sea Shipping.

It was reported that ERSTU now numbers 73 members from 13 countries and is now actively linked with the European Barge Union's River-Sea Committee. Together there is special interest in strengthening the inland waterways with the Baltic Sea region and ERSTU already has an active Donau sub-group with concern for Black Sea links. ERSTU's 43rd Board Meeting is to be in Vienna on Sept. 18/19.
